

Information for Week 11

17th April 2015

Here is a reminder of the submission arrangements for Week 11, further details of which you'll find in the *Deliverables* document that you received at the start of the semester.

The Week 11 deliverable – *The System and the Final Report* – has the following Parts:-

1. **Final Report: Design Documentation (5%)**
2. **Final Report: Implementation-Related Documentation (5%)**
3. **The Working System (20%)**
4. **Adherence to Process (10%)**
5. **Peer assessment for the system and the final report**

By **15:00, Thursday 7th May 2015** you should submit paper copy of **Parts 1, 2, 4 & 5** along with a disk/memory key for **Part 3** at Reception, ECS1. Forms for Part 5 (*Peer Assessment Form 2*) are available at Queen's Online under *CSC2018...Resources...Group Project*; follow the instructions on the form.

Demonstration of the Working System

Your group will be allocated a demonstration slot in **ECS2/01/002** on **Wednesday 6th May between 11:00 and 13:00** or on **Thursday 7th May between 09:00 and 11:00**, according to your scheduled advisory times. The demonstration will begin **promptly** at the start of the time-slot and will last about 10 minutes. At least two but preferably all members of your group should be present.

The detailed schedule for each group (*CSC2018 Demonstration Times 2015*) is available at Queen's Online under *CSC2018...Resources...Group Project*.

Each group should begin setting up its demonstration at least 10 (and up to 15) minutes before the demonstration time. You may use more than one computer (as many computers in your bay as you require) in order to show your game in action at different stages of play (start-up, mid-game, end-game). Remember, these demonstrations are an opportunity for you to present your application at its very best! Your team should leave the lab promptly (within five minutes) once its demonstration is completed, so as to make way for the next team.

On the day of the demonstration, follow the instructions on the schedule. Set up your demonstration **in good time, in your designated bay**, so that you are ready to demonstrate as soon as your assessors arrive.

Good luck in the demos.

Ian O'Neill
